FOOD & BEVERAGE

For over 45 years Severin Sea Lodge has been known for its hospitality to regular customers who appreciate the excellent cuisine and the friendly and attentive service.

It is very important to us to always offer our guests fresh and high quality food. All restaurants and bars are "open air", i.e. without air conditioning. We recommend casual tropical clothing, but in the evening we ask for "Smart Casual".

The **Kisima Buffet Restaurant** with indoor and outdoor tables and sea view is open for breakfast and dinner. Our dinners vary from live cooking and theme buffet evenings.

The **Safari Restaurant** at the Safari Pool is open for lunch, dinner and a late breakfast à la carte.

The **IMANI Dhow Restaurant** is an old, stranded dhow with à la carte fish and steak dishes.

The **Safari Bar** has a 360° round bar: a lively meeting place from morning to night.

The **Swing Bar** directly at the beach offers cocktails, fresh fruit juices and regular bar drinks.

The **Kisima Pool Bar** offers the best of both worlds. Here you can enjoy your drinks either in the water (swim up) or at an elegant bar in the dry. Every evening entertainment, live music shows, football and much more on the big screen.

Johari Roof Terrace is open for sundowners and special events.

Pool and garden service: Enjoy all drinks and snacks also at the beach, at the pool and in the garden.

Room Service: Eat and drink on your own balcony or room (24 hours).

GENERAL INFORMATION

Climate and temperatures: Mombasa has a tropical coastal climate and is therefore without a doubt a year-round destination. From November to mid-April, rain is the exception and temperatures rise to over 30°C. In April the rainy season sets in, which lasts until June. But even then there is usually no continuous rain, and midday temperatures are well over 25°C. The months from June to October are the most pleasant for Central Europeans.

Dress code: Please note that at Severin Sea Lodge, long trousers are mandatory for men for dinner.

Malaria: The risk of malaria is very low. Nevertheless, we recommend that you take the necessary precautions and consult your doctor before travelling.
